

Connor Morehouse Cover Letter

What I learned:

- How to import data into R
- How to use R to clean and transform data for analysis
- How to use multiple packages to effectively produce visualizations
- A great deal of familiarity with using R and solid base of experience that I can easily and quickly expand on

My goals:

- I plan to continue learning more types of visualizations and how to most effectively present data
- I plan to learn how to do more rigorous statistical analysis
- I plan to learn how make predictive models in R
- I plan to learn how to automatically scrape and compile data
- I plan to learn to eventually automate many processes with R

Grade request: B +

- I completed more than required amount of case studies for this level
- I was only a handful of tasks on time short for this level
- I only needed one more lead for this level, and intended to but I did mismanage how much time was left in the class
- I completed the semester project on time
- I feel I deserve this grade as I surpassed some requirements and just missed others, I do believe they balance out
- In addition I believe that the quality of my work was of a sufficient level and my final project is of high enough quality for this request
